ABOUT US

Central Asia Barometer (CAB) is a research non-profit organization, which is engaged in conducting public opinion polls and surveys in Central Asia.

EXPERIENCE

More than 20 surveys and polls implemented since 2012

Geography of our projects

Market, Media, and Opinion Trends Survey

01

In **2017** CAB launched a Market, Media and Opinion Trends survey, which aims to obtain a reliable information on public opinion in several countries of Central Asia

02

The project covers four countries: **Kazakhstan, Kyrgyzstan, Tajikistan and Uzbekistan, with Turkmenistan joining subsequent wave 4**

03

Two waves per year: in spring and fall. Data collection is conducted simultaneously in all countries.

04

Wave 1 was implemented in June-July of 2017.

Wave 2 was completed in November 2017.

Wave 3 was completed in May 2018.

Wave 4 is scheduled for October of 2018.

MISSION

Our mission is measuring social, economic and political atmosphere in Central Asia and improving access to information for citizens, government institutions, donor agencies, investors and researchers in the region and beyond.

Public opinion in the world

?

AREAS OF RESEARCH

We track attitudes and perceptions of the population in the following areas:

Wellbeing

(daily life satisfaction, incomes, economic expectations, safety, employment and other).

AREAS OF RESEARCH

We track attitudes and perceptions of the population in the following areas:

Economy

(economic situation and expectations, major economic problems and other).

AREAS OF RESEARCH

We track attitudes and perceptions of the population in the following areas:

Governance

(performance and trust to government institutions, quality of public services, attitude to democracy, other).

AREAS OF RESEARCH

We track attitudes and perceptions of the population in the following areas:

International

(perceptions of other countries and country leaders, religion, extremism, current events other).

METHODOLOGY

Surveys are conducted using a scientifically proven sampling and data collection methods, and rigorous quality control procedures.

METHODOLOGY

Data are collected using F2F (Tablet assisted personal interviews or paper & pencil interviews) or phone interviews (CATI).

SAMPLING

The survey is conducted with a sample size of 1,500 interviews in each country and reflects attitudes of adults 18+.

Margin of error of the survey does not exceed 2.5%, with a confidence level of 95%.

A combination of stratification and multi-cluster sampling was utilized to obtain a nationally representative samples.

DATA COLLECTION

- ✓ Face-to-face (F2F) interviewing using tablets.
- Random selection of respondents in households
- ✓ Standard questionnaire is used in all four countries. The questionnaire includes mostly close-ended questions, with average length of interview not exceeding 20-25 min.
- ✓

RESULTS

Results of the survey are available to all interested organizations:

- ✓ Data in SPSS and Excel format
- ✓ Methods report
- ✓ Report (Executive Summary, key results, methodology).

Results are available by subscription or one-time purchase.

Our partners

For quality data collection the Central Asia Barometer relies on its network of experienced and reputable research partners in other countries :

M-Vector – Kyrgyzstan,
Tajikistan

Ipsos, GfK -Kazakhstan

Point Research

Point Research –
Uzbekistan

D3systems –
USA

We formed a successful and valuable cooperation with a D3 Systems, a U.S. based research company, which helps us to refine methodology of the project and promote the results around the world.

SURVEY TOPICS

- ✓ Right/wrong direction, top national problems, country and household economic performance.
- ✓ Perceptions of terrorism and violent extremism.
- ✓ Ratings of parties and vote intentions.
- ✓ National and ethnic self-identification.
- ✓ Sources of news and information, use of the Internet, connectivity to social media.
- ✓ Attitudes toward foreign countries and leaders.
- ✓ Religious affiliations and norms.
- ✓ Standard demographics (gender, age, education, occupation, ethnicity, language spoken at home, social wellbeing).

QUALITY CONTROL

To ensure the highest quality of data, CAB implements rigid quality control system. Quality control procedures include direct observations by supervisors, back checks by phone, post-field review of audio files.

Additionally, 100% of cases are subject to back check via GPS control.

Country is headed in the right direction

Public opinion
surveys in Central
Asia.

The image shows an elderly man with a long white beard and a black cap with white patterns, sitting on a patterned rug. He is looking towards a woman with brown hair tied back, wearing a brown leather jacket and a striped scarf. They are in a room with light blue walls and a patterned rug. A blue rectangular frame highlights the text "Public opinion surveys in Central Asia." in the foreground.
