

Socio-economic assessment of existing forest and agroforestry production systems for walnut and apricot production in Kyrgyzstan – A field study using Monte-Carlo simulation analysis

Presenter/Author:

Md Sofiullah^a

Research Focus: Resilience and sustainability, Economics

Email: md.sofiullah@hochschule-rhein-waal.de

Co-author/ PhD Supervisor:

Prof. Dr. Dietrich Darr^{b,c}

Research Focus: Sustainable and resilient farming and food systems

Email: dietrich.darr@hswt.de

Venue: ‘Life in Kyrgyzstan’ (LiK) Conference 2024

Location: Orion Hotel, Bishkek, Kyrgyzstan

Presentation mode: Hybrid/online

Date: 10 – 11 October 2024

^a PhD student, Scientific Research Associate, Faculty of Life Sciences, Rhine-Waal University of Applied Sciences (HSRW), Kleve, Germany

^b Professor for Sustainable and resilient farming and food systems, Faculty of Agriculture, Food, and Nutrition, Weihenstephan-Triesdorf University of Applied Sciences, Germany

^c Professor of Agribusiness, Faculty of Life Sciences, Rhine-Waal University of Applied Sciences (HSRW), Kleve, Germany

- Field trip to Kyrgyzstan in March 2023
- Five research and SME partners from Germany, and 13 Central Asian partners
- Research institutions, private sector and civil society organizations
- ***SUFACHAIN: Promoting sustainable land management through product, process and SME development in NTFP and agroforestry value chains of Central Asia***

- **Field study overview**
- **Study locations**
- **Household survey preliminary findings**
 - **HH demographics**
 - **Land use**
 - **Tree, crop production and use**
 - **Livestock production**
 - **Agroforestry**
 - **Labor and contract services**
- **Future research interest**

Field study overview

- Study locations: Batken, Arslanbob Aiyl Aimak, Jalal-Abad (Kyrgyzstan)
- Study time period: July 2024 - August 2024
- 256 household surveys conducted via enumeration team (random sampling)
- Focus Group discussion (FGD) (2 for each region)
- Expert Interview (EI) (2 for each region)

Source: [Asia - Detailed | MapChart](#)

Field study overview (contd.)

Household survey design

- **Socio-economic assessment**
→
 - Farm/off-farm income & expenses
 - Financial situation (Assets, Liabilities, HH expenses)
- *Crop/Tree management* → (Philip Schierner, Soil Sciences, HSRW)
- *Irrigation management, Coping & adaptation strategies* → (Dr. Jannike van Bruggen, Water Resource Management, HSRW)

FGD & EI responses

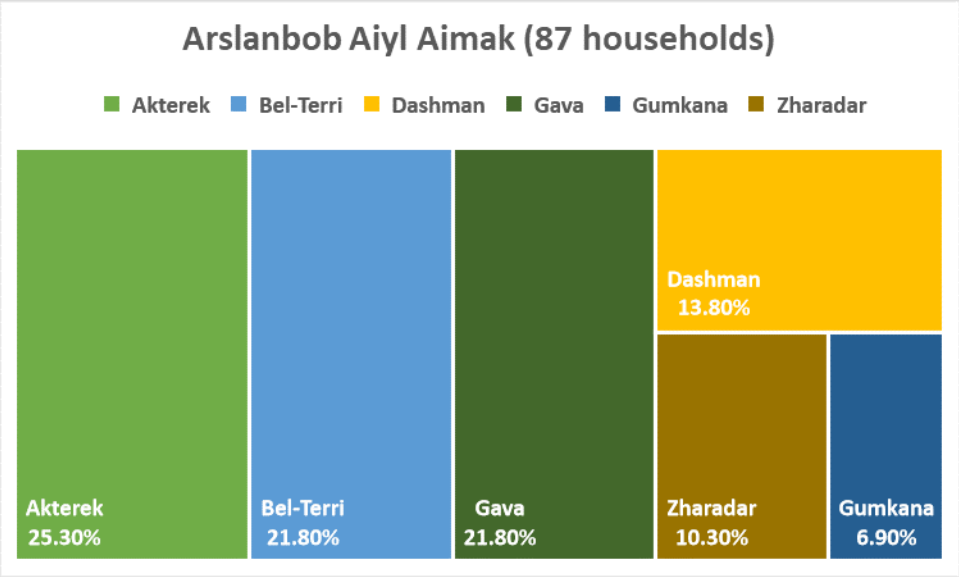

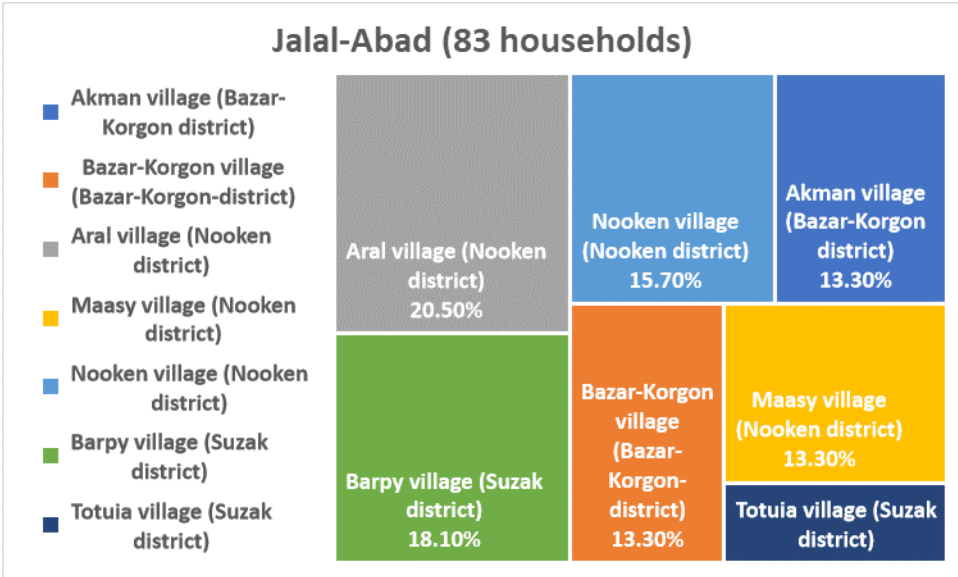

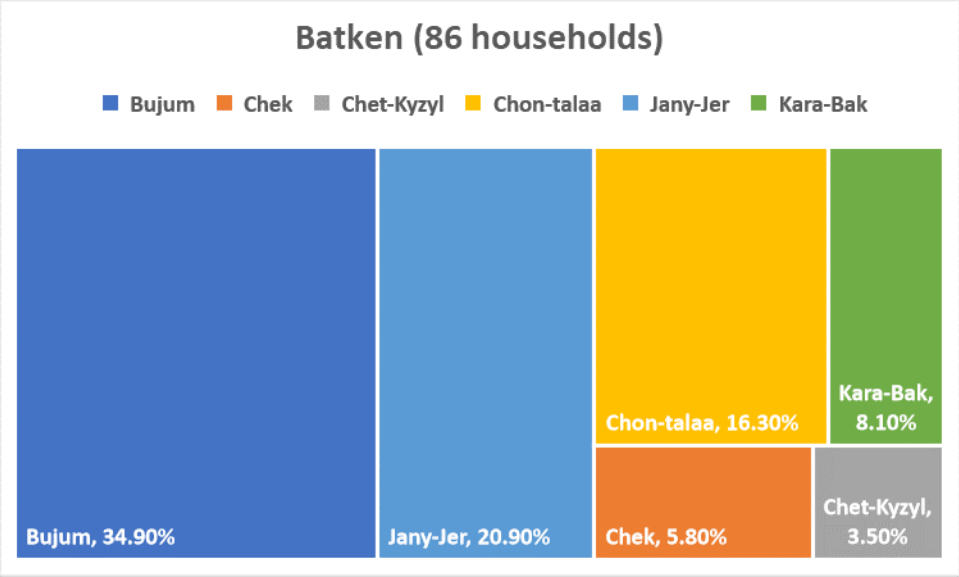

- Expected price fluctuations
- Migrant laborers origin
- Farming objectives
- Biophysical traits of fruits, crops
- Shocks
- Farming activity challenges & measures taken
- Extreme weather conditions
- Improvements vital for agricultural development

Research aim

- ST: *Static* analysis
→ Capital Budgeting techniques, Ratio analysis
- LT: *Dynamic* analysis → Monte-Carlo Simulation

*Let's see the preliminary findings!
– subject to change*

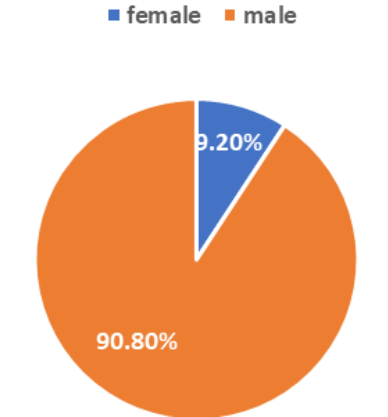

Study locations

Respondent's gender (Batken)

Respondent's gender (Arslanbob Aiyl Aimak)

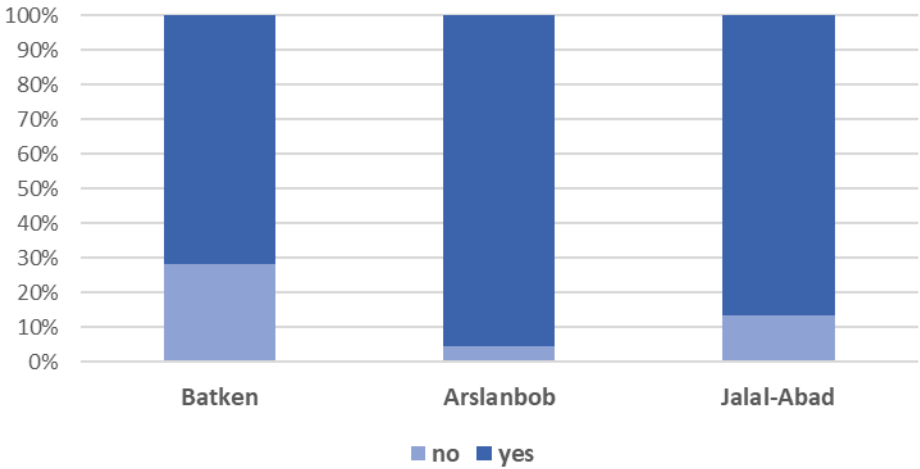

Respondent's gender (Jalal-Abad)

Household demographics

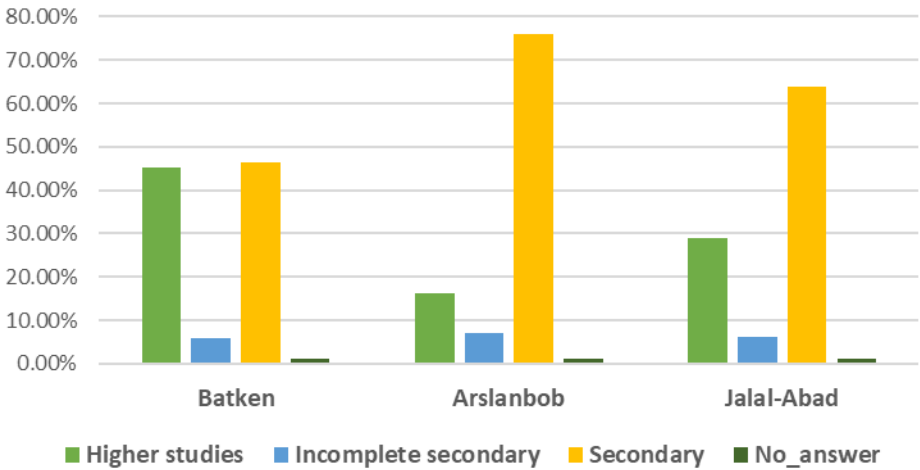

Respondent HH head

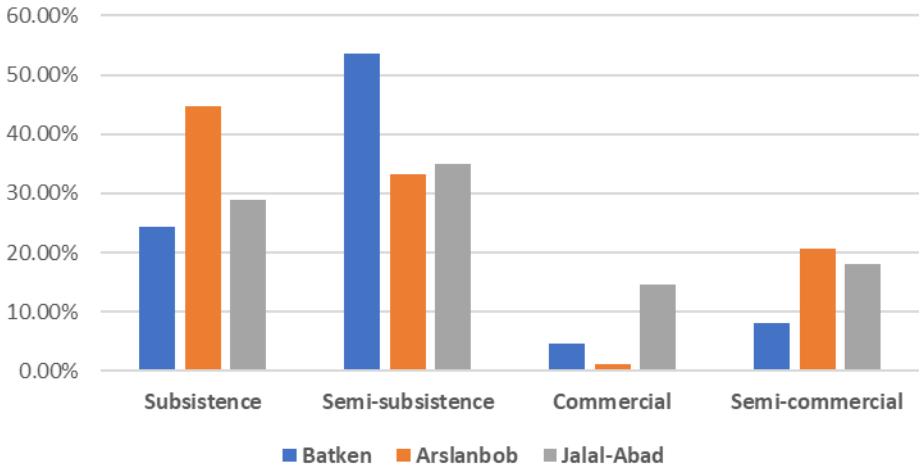

HH head average years of farming experience

HH head education

Purpose of farming practice

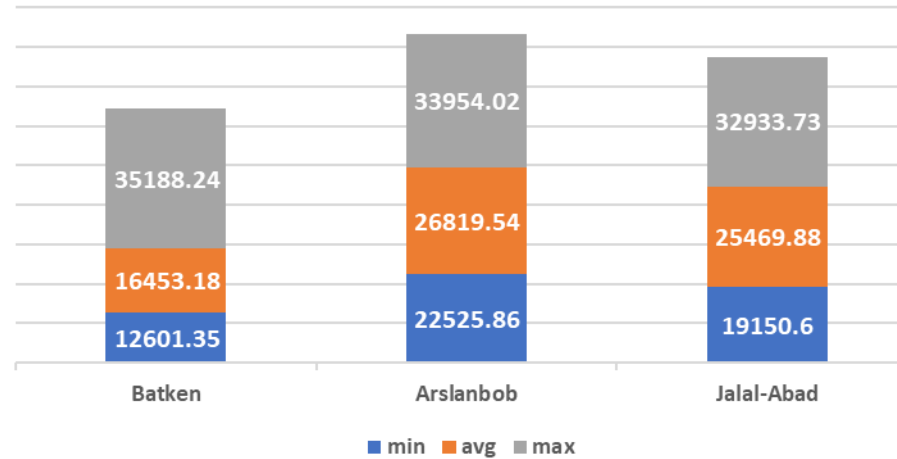

Household demographics (contd.)

HH size (total average)

■ Batken ■ Arslanbob ■ Jalal-Abad

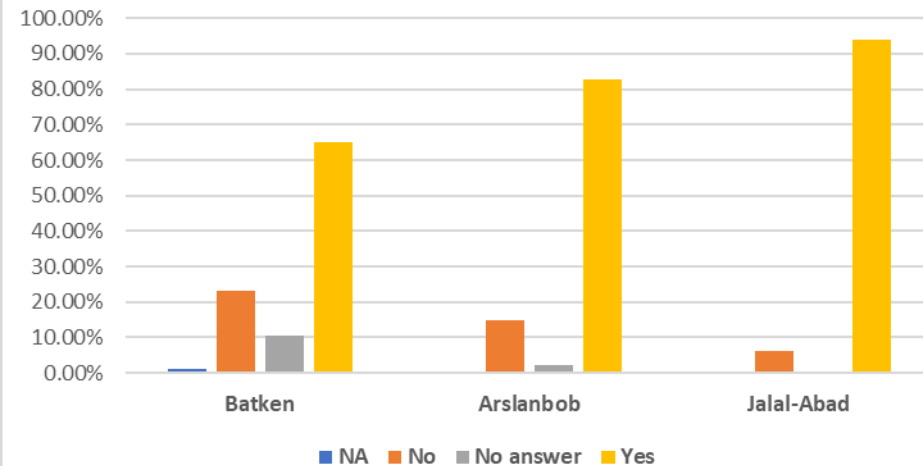

HH expenditure (avg-weighted; KGS/month)

HH farm contribution

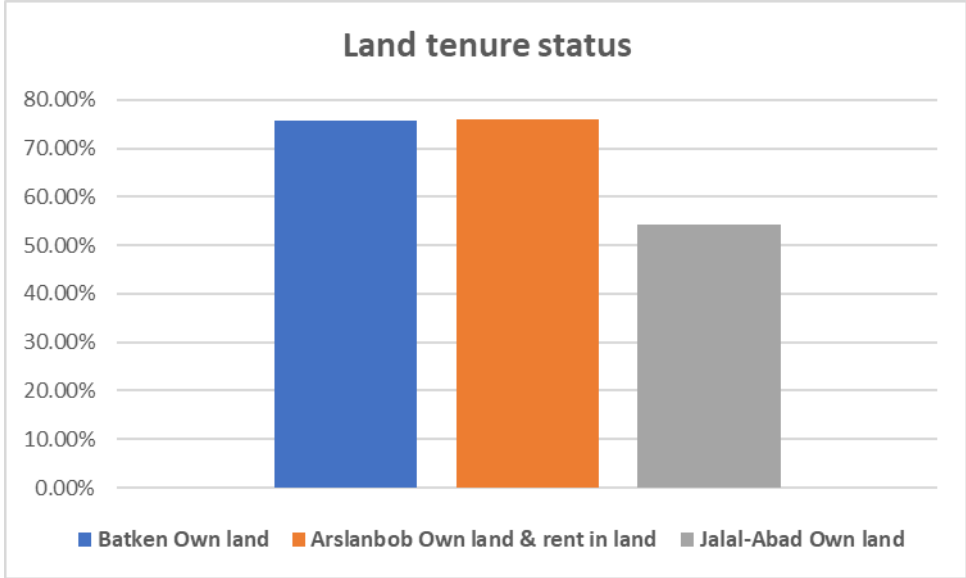

HH off-farm income

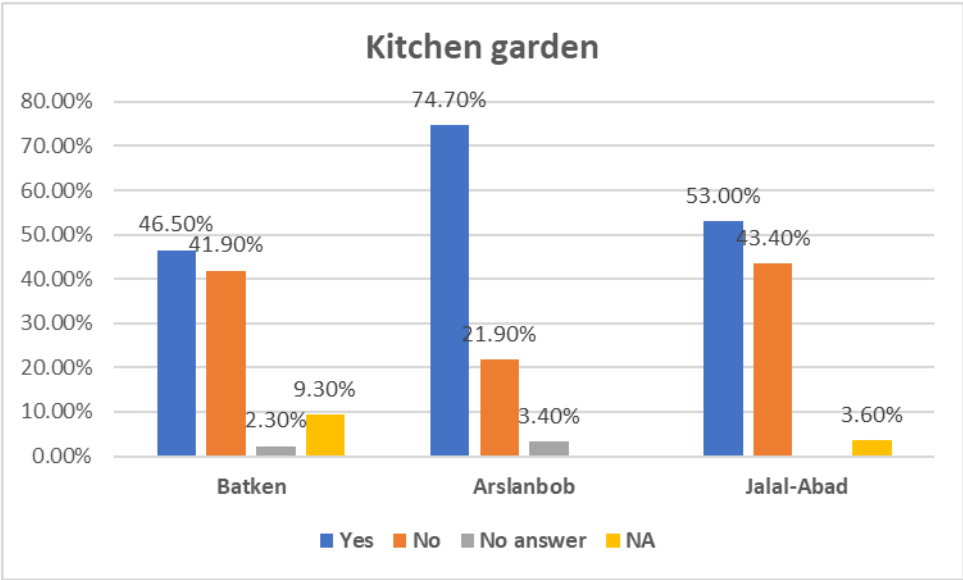

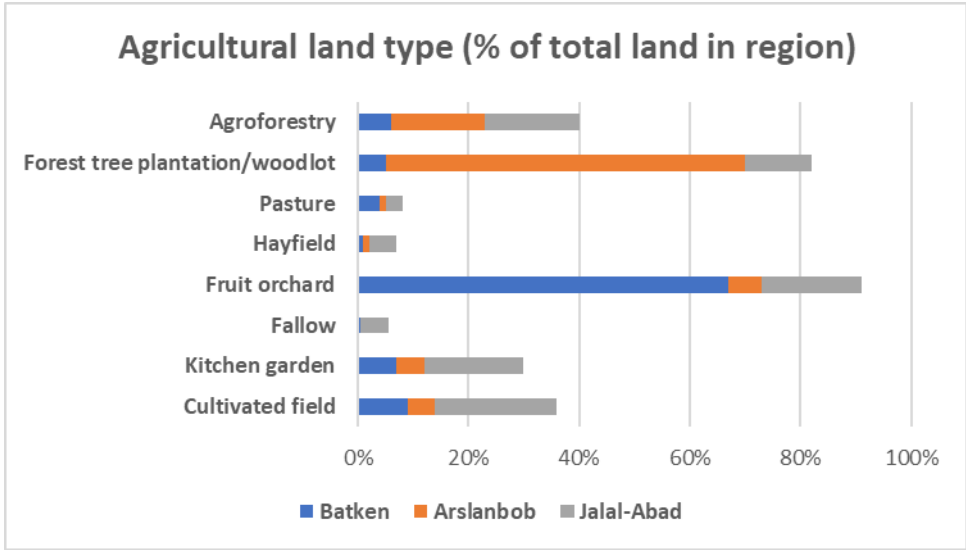

Off-farm income sources

- Contract services
- Pensioner
- Self-employed
- State-employed
- Seasonal employed
- Social welfare
- Local labor, off-farm
- Tourist services
- Salary-based

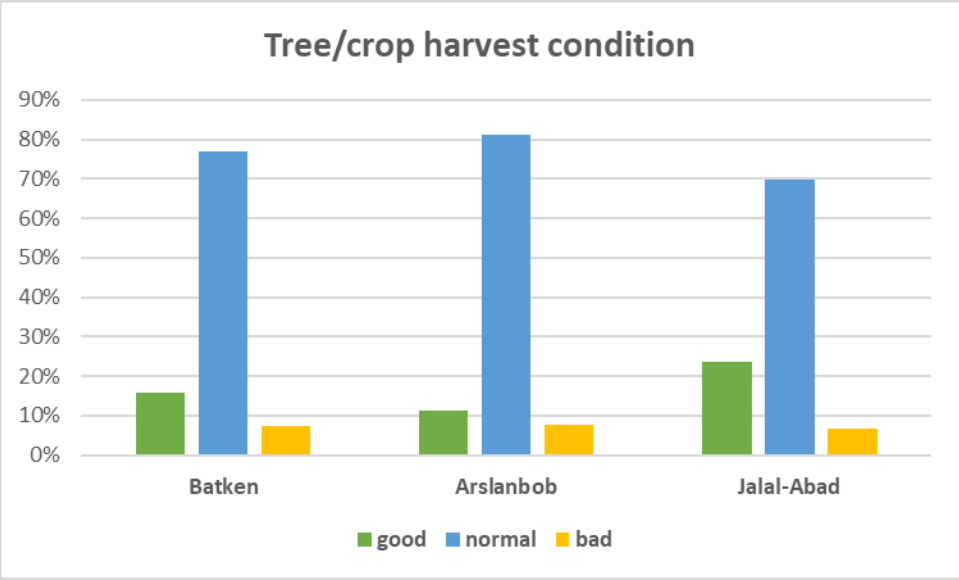

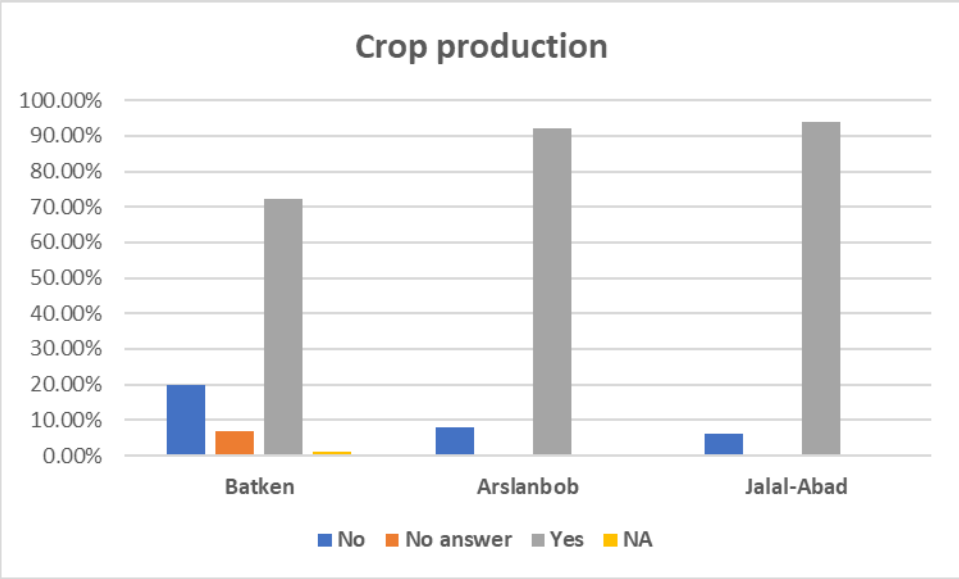

Land use

Farm size (in ha)			
	Batken	Arslanbob	Jalal-Abad
Range	0 - 1	0 - 16	0 - 6
Avg	0.172655	1.365511	0.851586

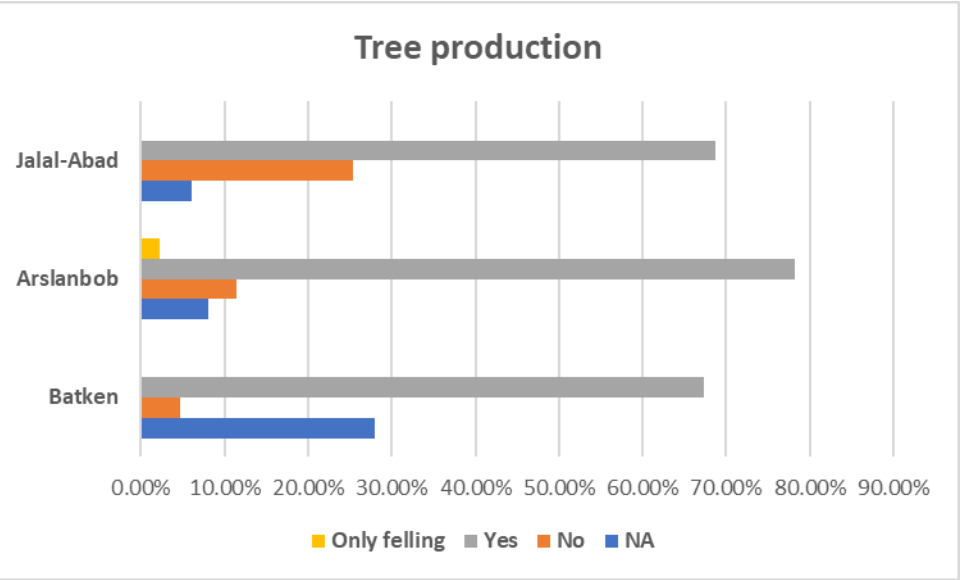

Tree, crop production and use

Batken	Arslanbob	Jalal-Abad
Alfalfa	Alfalfa	Alfalfa
Barley		
Fieldgrass	Fieldgrass	
Maize	Maize	Maize
Carrot		
Eggplant		Eggplant
Garlic		Garlic
Paprika		Paprika
Potato	Potato	Potato
Various vegetables	Various vegetables	Various vegetables
Clover	Clover	
Flowers		Flowers
Tomato	Tomato	Tomato
Tobacco		
		Cotton
		Strawberry
		Rice
		Wheat
		Watermelon

Tree, crop production and use (contd.)

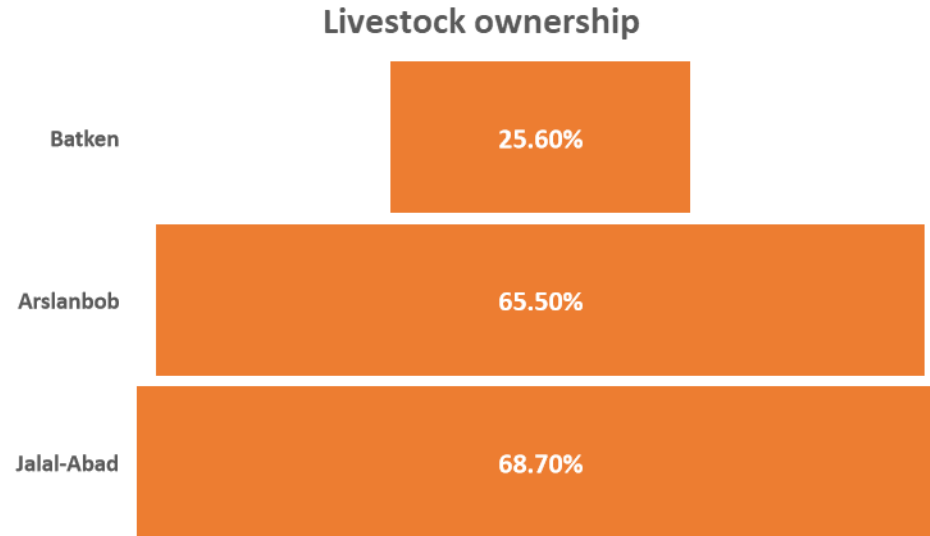

Purpose of tree/crop harvest

- Food
- Fodder
- Fuel
- Timber
- Land benefits

Batken	Arslanbob	Jalal-Abad
Apricot	Apricot	Apricot
Peach		Peach
Mulberry		Mulberry
Pear	Pear	Pear
Cherry		
Plum		Plum
	Almond	
	Walnut	Walnut
	Hawthorn	Hawthorn
	Poplar	Poplar
	Beech	
		Fig
		Lemon
		Elm
		Willow
		Pine

Livestock production

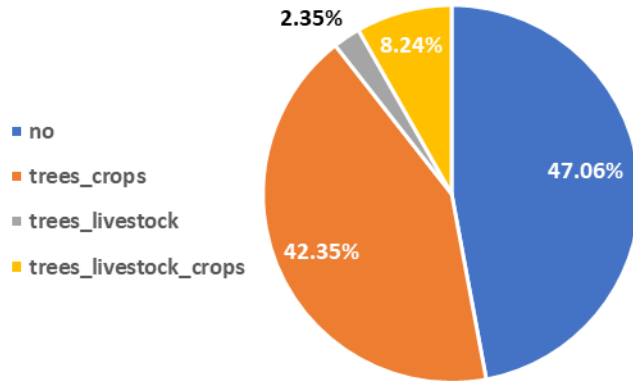

- Cattle
- Poultry
- Sheep

- Cattle
- Poultry
- Sheep
- Horse

- Cattle
- Poultry
- Sheep
- Horse
- Donkey

Agroforestry (AFS)

Agroforestry (Batken)

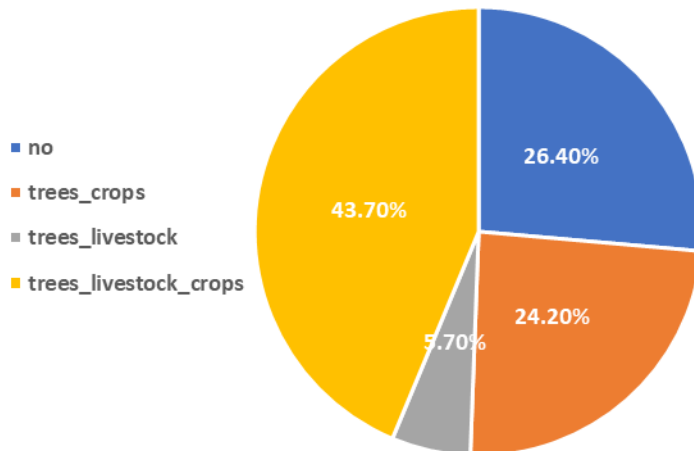

AFS practice

Batken

- Alley cropping (Trees/shrubs in rows with crops in between)
- Food forest (Diverse, edible plant layers mimicking a forest)
- Homegarden (Small, diverse garden near a home)
- Windbreak (Trees/shrubs planted to protect)

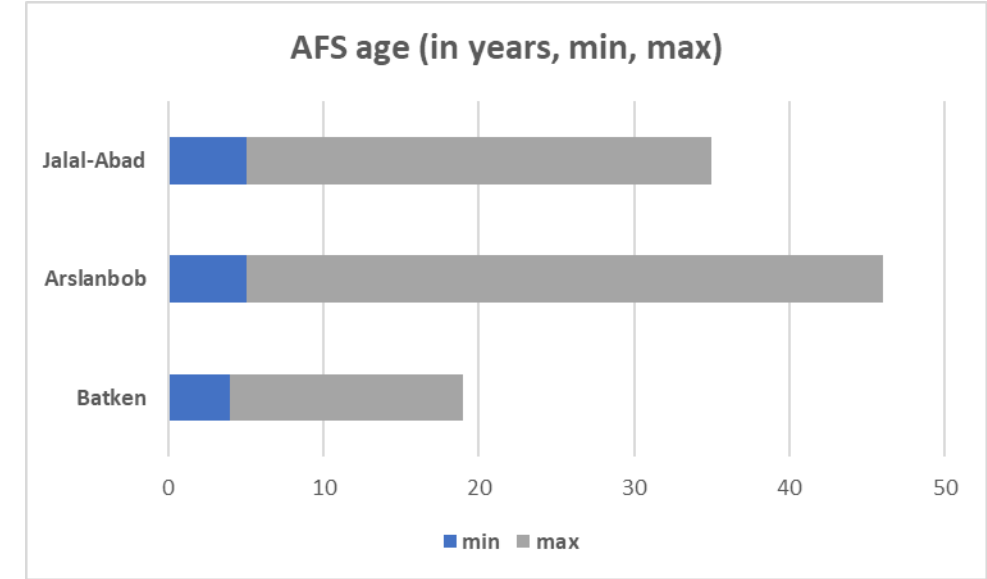

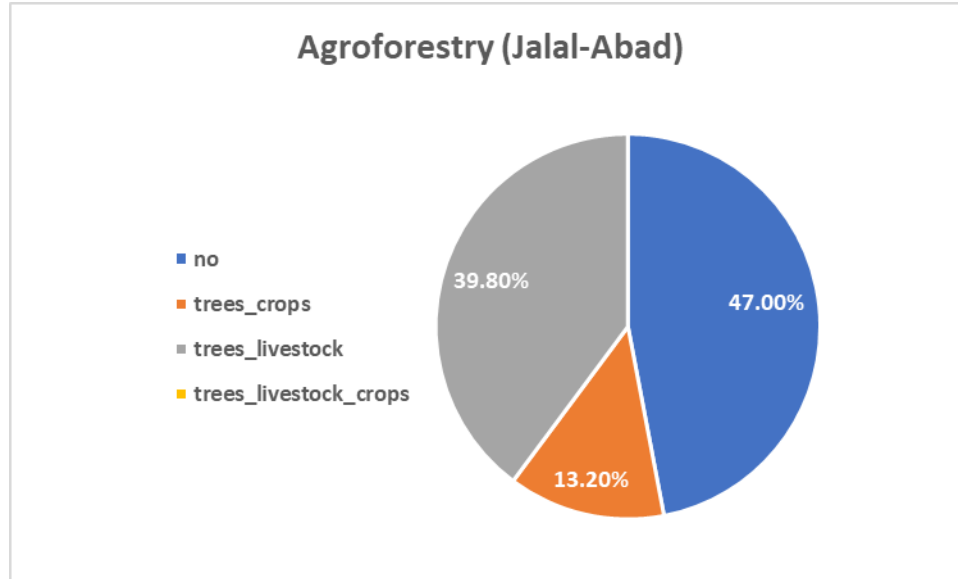

Agroforestry (Arslanbob)

Arslanbob

- Alley cropping (Trees/shrubs in rows with crops in between)
- Homegarden (Small, diverse garden near a home)
- Riparian buffer (Vegetation strips along waterways)
- Windbreak (Trees/shrubs planted to protect)
- Forest farming (Growing crops under a forest canopy)

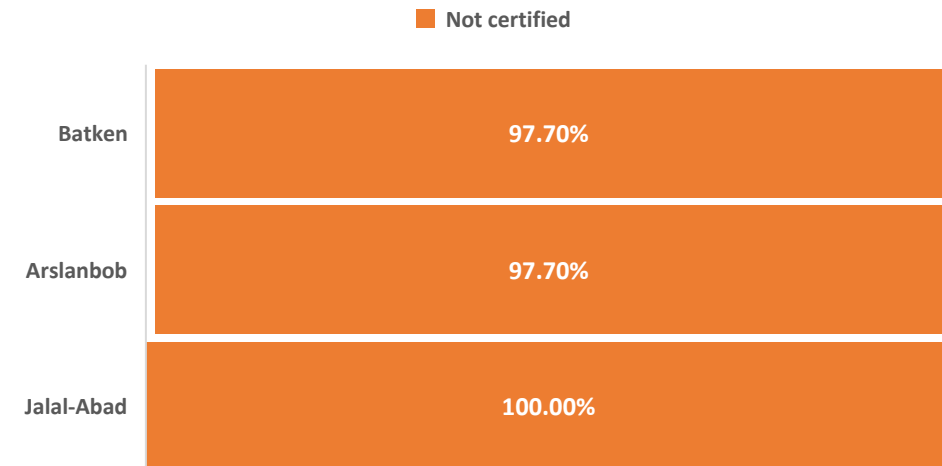

Agroforestry (AFS) (contd.)

Jalal-Abad (AFS practice)

- Alley cropping (Trees/shrubs in rows with crops in between)
- Homegarden (Small, diverse garden near a home)
- Riparian buffer (Vegetation strips along waterways)
- Forest farming (Growing crops under a forest canopy)

Certification

Agroforestry (AFS) (contd.)

Reasons for adopting AFS by respondents

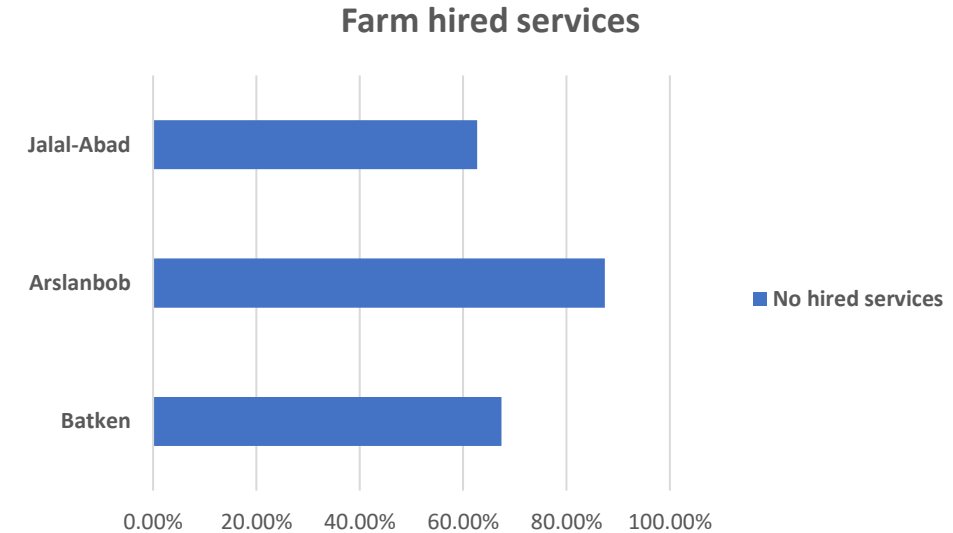

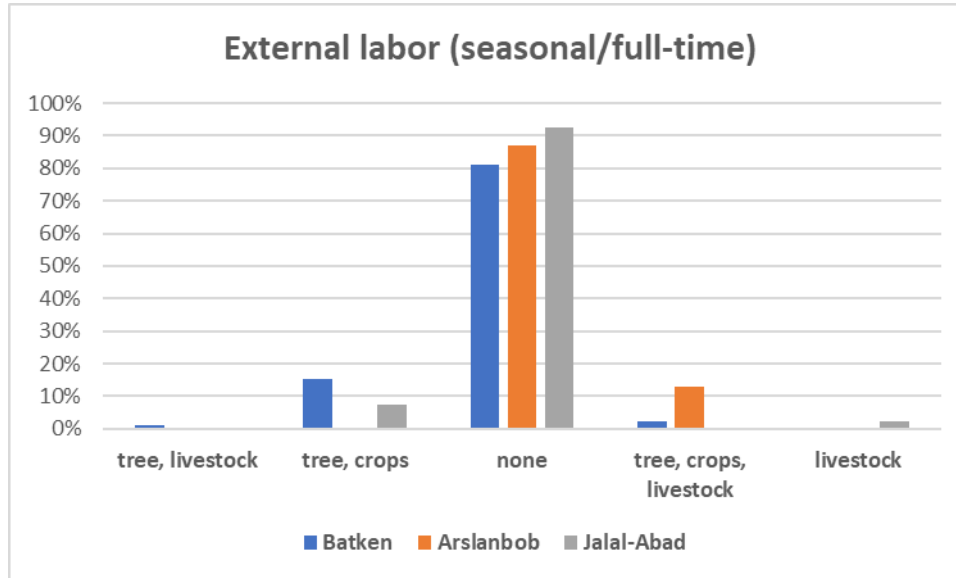

- Environmental benefits
- Protection for livestock
- Improve soil fertility
- Improve water efficiency
- Higher yields

Reasons for not practicing AFS by respondents

- High input costs
- Less harvest
- High investment
- Water shortages
- Lack of machinery
- Inadequate weather conditions
- Pest and disease problems
- Limited knowledge

Labor and Contract services

Hired services

- Harvesting services
- Land preparation
- Planting
- Growing
- Transportation

Future research interest...

- Request to connect, collaborate, knowledge-sharing with experts!
- Topic of interest: **Valuation of non-marketed/non-monetary ecosystem services from agroforestry production systems in Central Asia**

Thank you! 😊
